OCTOBER 2022

In This Issue: CSP Annual Call awardees | Black fungi survival secrets | JGI@25: Strengthening Soybean | 2022 User Meeting Recap | Active Proposal Calls

Welcome our 2023 CSP recipients!

The JGI welcomed a new crop of scientists into our Community Science Program at the start of October.

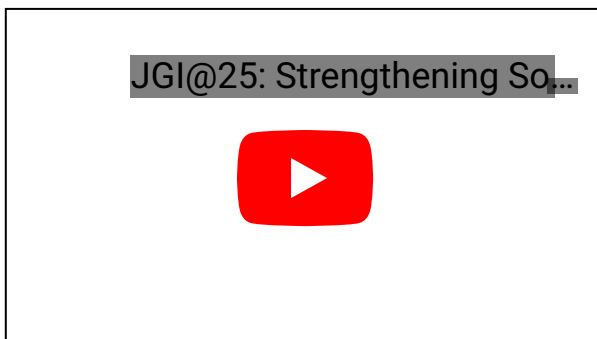

You can find more information about the awardees and their proposals **on Twitter** and **our website**. Learn more about the **CSP Annual Call** [here](#).

The survival secrets of Antarctic black fungi

Black fungi are microscopic and mighty. They survive everywhere from Antarctica to Joshua Tree National Park, despite extremely harsh conditions — and their survival secrets could one day help other organisms survive hotter, drier climates. So University of Tuscia researchers **Laura Selbmann** and **Claudia Coleine** are working with scientists from around the world — and the JGI — to understand them better. **Check out the latest episode of Genome Insider to learn more!**

JGI@25: Strengthening Soybean

Recently, we caught up with **Gary Stacey** of University of Missouri, **Sebastien Duplessis** of INRAE and **Peter van Esse** of the Sainsbury Laboratory to discuss the impact of the original soybean genome on fighting Asian Soybean Rust. **Learn more on our website!**

User Meeting Recap: Jennifer Doudna, Ari Patrinos and more...

JGI held its Annual Meeting Aug. 29-31, featuring **keynote speeches from some of the brightest minds in genetics**, as well as **retrospective talks celebrating the JGI's 25th anniversary** delivered by key stakeholders who reflected on the JGI's quarter-century in genomics research.

Active Proposal Calls

Interested in working with the JGI? You can find **details about all of our proposal calls here**.

We are currently reviewing **Functional Genomics** proposals submitted to our **Community Science Program**. The Functional Genomics call reviews proposals twice each year; the next deadline is **Jan. 23, 2023**.

Next month, JGI will be reviewing **New Investigator** proposals submitted to our **Community Science Program**. New Investigator proposals are also reviewed twice annually, with the next deadline **March 3, 2023**.
